

CONiQ[®] Cloud

Maximize Performance

Minimize Maintenance Costs

Maximize Uptime

Protect your most valuable assets

The CONiQ Cloud is the IoT backbone to make your machines and processes smarter. It is designed for you to access data from your assets and offers various benefits from simple monitoring and transparency to ad-hoc service expert support on immediate and historic machine issues.

In addition, the CONiQ Cloud also includes easy-to-use dashboards with KPI information directly on your mobile device, so you have all relevant information with you - any time, any place.

Thanks to the global setup, your need for support on data interpretation, recommendation for action and constant improvement is just one click away. Thus, you can get complementary support on all level around the data of your assets to support your operation and maintenance team.

Advantages of the CONiQ[®] Cloud:

Remote Support by OEM experts

Global Access to Screen KPIs

Screen Qualified Sensor System
